ROLLEASE ACMEDA
CONTRACT

Contract Series Specialty Shading Solution

A Pocket For Every Shade

Retain design integrity with complete window-to-wall recessed shade pocket systems from Rollease Acmeda Contract. Designed to meet today's commercial project needs, our shade pocket systems are made with high-strength aluminum that is both workable and resistant to corrosion.

Constructed to work with Rollease Acmeda Contract Series motorized or manual shade systems, the simple pocket design can also be paired with other shading systems while still allowing shades to seamlessly disappear.

Rollease Acmeda Ceiling Pockets
are easy to install and add a completed
look to any shading project.

SHADES BY MATISS

AP Series

Ceiling Pockets

One Series, Infinite Possibilities

The AP Series ceiling pocket family from Rollease Acmeda Contract are our all-purpose solution for recessed shading applications. These pockets are the smart choice for flexibility and adaptability for your next commercial project.

Size options include square 5" and 6" models, as well as a rectangular 7"x 9" version. All sizes are available with or without a ceiling tile lip for drop-ceiling integration.

All options are constructed of aluminum and are offered in a powder-coated white, with the 5" model also available in an anodized finish.

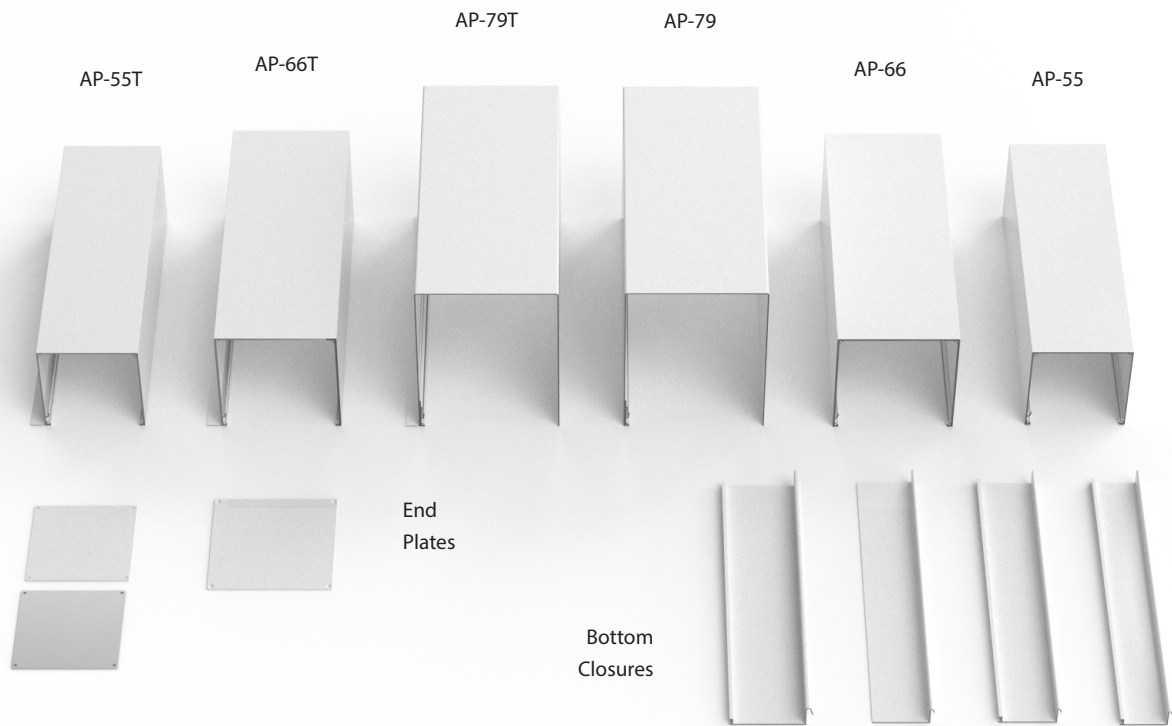

Traditional

Ceiling Pockets

Additional ceiling pockets from Rollease Acmeda are available in 3", 4", 5" and 6" sizes.

All traditional pockets are available in 16' lengths and come in a powder-coated White or grey Anodized finish. The aluminum construction allows for on-site cutting for a cleaner fit.

Add end plates and bottom closures to complete the look.

AP Series Ceiling Pockets

Domestically Stocked

Ships directly from warehouses located in the United States.

Complete Size Range

Accommodate any size project with our complete range of ceiling pockets.

Complete The Look

Rotationally symmetrical end plates and removable bottom closures available to complete the look.

Multi-functional

Works with single or dual, manual or motorized, roller or drapery shading systems.

10' Lengths

Shipped in 10' lengths to accommodate transport to and from job sites.

Field Adjustable

Make cuts on-site for a precise fit.

Additional Closure Options

Ceiling Pocket Accessories

To complete the appearance of Rollease Acmeda Contract pockets, we offer end plates and removable bottom closures to deliver a finished, sleek look while providing easy access to shades after installation.

Bottom Closures

Bottom closures are available for the AP Series and traditional ceiling pockets. Three widths are available (2.22", 2.67" and 2.73" returns) for single and dual shade applications. Bottom closures hide the shades when looking directly up from below.

Bottom closures are available in powder-coated white or anodized finish to match the aesthetic of the ceiling pockets and are easy to install or remove for maintenance.

These aluminum bottom closures allow for on-site cutting without compromising the integrity of the structure.

End Plates

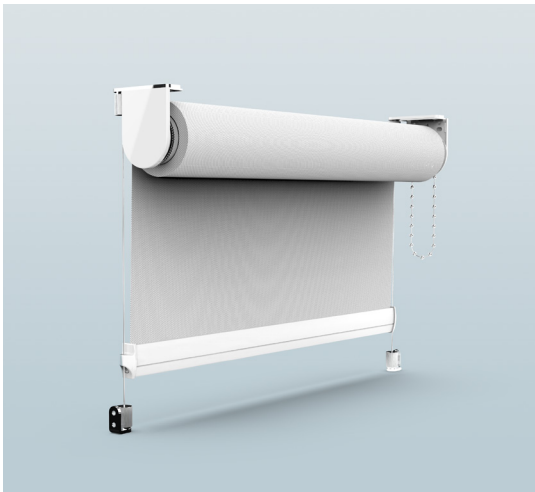

For projects with pockets that are in plain view, install the proper metal end plates to give the pocket a finished look.
