

CONTRACT SPECIALTY

BOTTOM UP ROLLER SHADE

Low Voltage 12V / Solar / Li-ion Battery

The Rollease Acmeda Contract Bottom Up Shading System is an innovative system, perfect for ground floor or office applications where privacy and light harvesting are required. Bottom Up shades let the natural light in from the top of the window while shading the bottom section for privacy and solar control. Utilizing Contract Series One manual or motorized / automated systems combined with an innovative self-levelling hem bar adjusting system which limits service calls and ensures a long, trouble free life of the system.

FEATURES

- Optional Solar Panel provides permanent net-zero, off grid charging option in a discrete and efficient package with multiple mounting options
- Internal Li-ion rechargeable battery will provide 500+ complete rotation cycles before recharging is required.
- Low voltage wired power panel and transformer options available to compliment most low voltage wiring scenarios.
- Newly designed Heavy Duty Idler assembly consists of Teflon and glass filled nylon to eliminate noise and resist wear and tear for the life of the shading system.
- Powder coated steel box brackets 1/16" thick
- Wall mounted, desktop and stylish handheld controls available
- Optional integration with many popular automation systems
