

# CONTRACT SERIES SPECIALTY

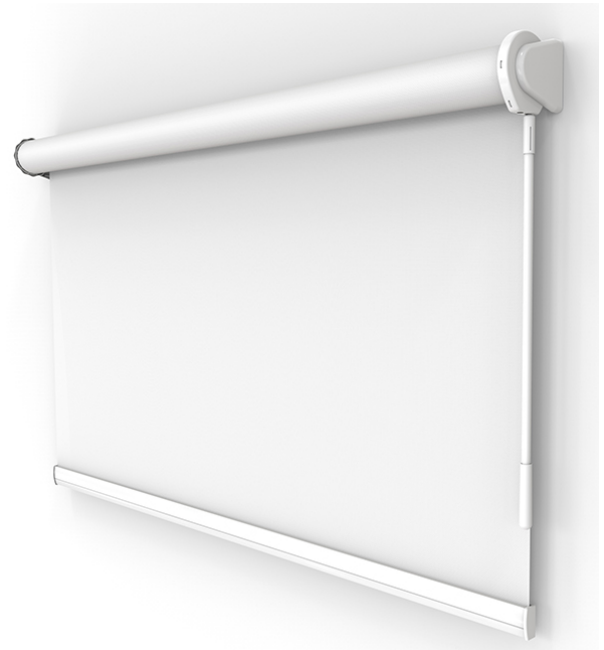

## Easy Spring Wand Manual Shade / Child Safe Option

This patented system resets the standard in child safe shades with user-friendly controls and slim line aesthetics, eliminating the need for free-hanging cords or chains. The easy to use wand allows a continuous, seamless one-handed operation, providing an improved level of comfort when gripping the wand, particularly for impaired users. Unobtrusive and stylish, the wand provides an ideal operation for longer roller shades, controlling a broad range of shade sizes. The redundantly controlled dual operation further improves the user experience, allowing users to conveniently control the shade using either the wand or weight bar. The technologically advanced Auto-rise feature ensures smooth and controlled self-rising with only a light pull of the weight bar or wand, stopping at the ideal top position.

### Features:

- Premium child safety with easy to operate wand control.
- Meets ANSI/WCMA A100.1-2018 standard for child safety.
- Alternative weight bar override control.
- Auto-rise functionality with manual lowering.
- Top limit setting for a hassle free user experience.
- Decelerator for smooth controlled movement.
- Clean installation without chain or tensioner.
- Optional cassette fascia upgrade.
- 30" Minimum shade width. 8' Maximum shade drop.
- Up to 8' drop x 8' width with a maximum of 52 sq. ft. before linking.

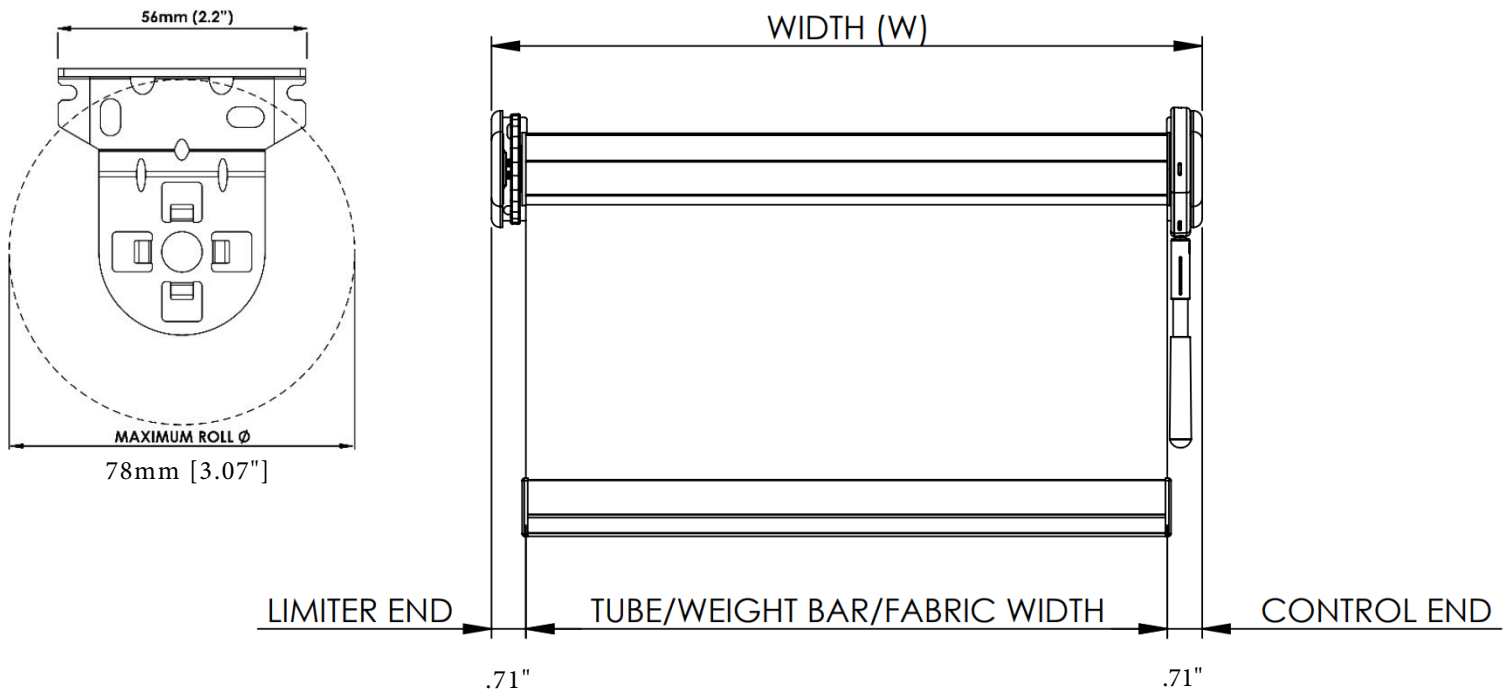

### FINISH COLORS

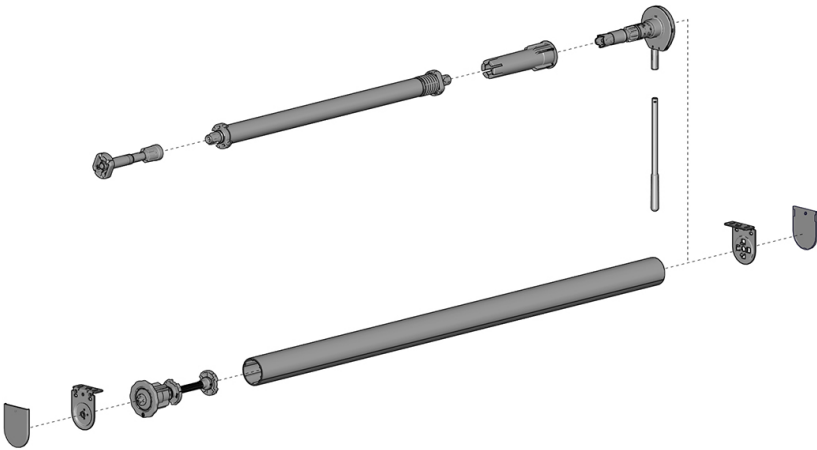

Match this solution with any of our sunscreen, block out or high performance fabrics for a complete finished solution. See our document library for comprehensive information including HPD, LEED & NRC specifications.
